

## Marshmallow Roaster!

Our group was able to create a portable s'mores maker by making our very own parabolic mirror.

The sunlight will hit the mirror and will concentrate at the focal point. This energy will then reflect off and there will be enough heat at the focal point to roast the marshmallows!

### *FOOD FACTS:*

1. Graham crackers (may contain nuts)
2. Hershey's Chocolate (produced in a factory that also uses nuts)
3. Marshmallows
